

Delivering the sounds of silence for your HIPAA compliance

Pro Squared Consulting can help you address HIPAA compliance for unintended, overheard oral communication.

Working primarily through passive control, our unique products better enhance privacy than currently available technology. Custom acoustic designs can either blend seamlessly into an environment, or be as attractive as a fine piece of art.

For further information on our unique products to help you address HIPAA compliance call 330-322-5857 or visit us at www.pro2consulting.com
